

# Caraustar Easy Pour Concrete Forming Voids

Easy Pour Concrete Forming Voids are designed for use in precast or cast in place concrete. Easy Pour Concrete Forming Voids can result in savings due to faster pouring and forming of larger areas and reduced amount of concrete and steel needed.

**Economical solution for:**

- floor
- roof slab
- bridge
- deck
- beam
- pier construction

**Readily placed**

Can be placed either manually or by crane for larger diameters and longer lengths. Rebar void saddles are recommended to hold void form in position.

**Weather and moisture resistant**

Constructed of 100% recycled paperboard with exterior and interior surfaces treated for protection against moisture and adverse weather conditions.

**Pouring**

Conventional methods can be employed. For very long forming voids, concrete should be placed with an elephant trunk or similar means – not dropped on void tubes.

Concrete can be vibrated extensively without damaging Easy Pour Concrete Forming Voids.

Outer Diameter	Wall Thickness
6.35"	.175"
7.40"	.200"
8.40"	.200"
10.45"	.225"
12.45"	.225"
14.50"	.250"
16.60"	.300"
18.60"	.300"
20.70"	.350"
22.75"	.375"
24.75"	.375"
26.75"	.375"
28.80"	.400"
30.85"	.425"
32.85"	.425"
34.90"	.450"
36.90"	.450"

Other sizes available upon request

**Available in a full range of standard and custom sizes**

- standard outer diameters up to 36.90"
- wall thickness up to .450"

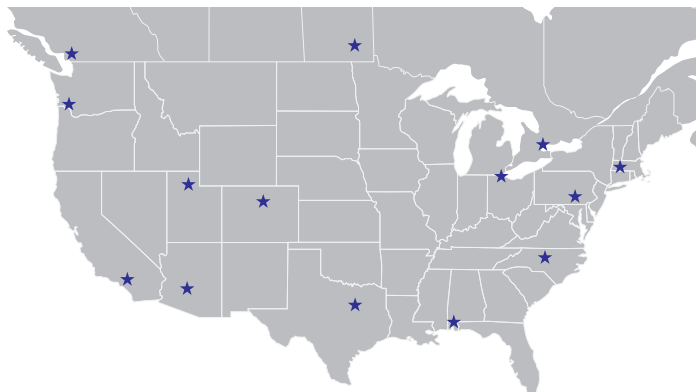

**End closures and custom connectors available**

**Availability** – Manufactured at Caraustar® plants throughout North America and Canada

**LEED® Qualified** – Manufactured with 100% recycled paperboard produced by our own mills

**Recyclable**

**Caraustar® Construction Tube Manufacturing Locations**

- Arlington, TX
- Bay Minette, AL
- Chicopee, MA
- Delta, BC
- Denver, CO
- Kernersville, NC
- Longview, WA
- Ontario, CA
- Phoenix, AZ
- Salt Lake City, UT
- Toledo, OH
- Toronto, ON
- Winnipeg, MB
- York, PA
