

Roll Packaging

Caraustar® offers a complete line of roll headers and roll wrap, designed for use on all manual and robotic finishing equipment.

A leader in roll headers and roll wrap, Caraustar® offers a complete range of product types, weights and diameters to meet every need. In addition, as a value-added service to our customers, we offer our technical expertise in roll finishing. Our specialists can provide insight on industry best practices.

Roll Headers

Roll headers help to protect finished rolls in the pulp and paper and steel industries. They provide protection from the kind of damage that can result from crimping, moisture, dirt and other external elements.

Capabilities

- Diameters range from 15" to 80"
- Heat seal

Outside Roll Header Substrates

- Chip Board
- Kraft Linerboard
- Poly-coated Chip
- Poly-coated Kraft Linerboard

Inside Roll Header Substrates

- Chip Board
- Kraft Linerboard
- Corrugated
- Poly-coated corrugated
- Hybrid

Roll Wrap

Roll wrap helps to protect finished paper rolls from damage that can result from moisture, dirt and other elements.

Capabilities

- Poly-coated and Poly-laminated
- Curl and moisture control
- Plain Kraft
- Scuff resistance
- Selection of basis weights
- Wide width co-extrusion
- Up to 104" wide and 60" diameter
