

EASYPOUR™ Professional Seamless

Caraustar® EasyPour™ Professional Seamless Concrete Forming Tubes

For jobs that demand aesthetically smooth concrete columns without seam markings.
No manual finishing needed.

Combining innovative technology and knowledge-based engineering, Caraustar® offers specifiers, designers and architects a seamless concrete forming tube that will meet their exacting standards for smooth columns.

Superior Aesthetics

Produces a unique smooth finish that is sure to please any building professional

Specially Formulated Smooth Coating

Unique coating inside the tube creates a smooth concrete finish without spiral seams, eliminating the need for manual finishing

Protected with EasyPour™ WeatherShield

Built-in moisture resistance minimizes schedule changes due to inclement weather

Convenience

One time use tubes allow faster setup for multiple column pours with no cleaning, reassembling or return shipping

Installation

Easily placed manually or by crane

Strength

Engineered to withstand the full hydro- static pressure of a continuous pour*

Popular Sizes Available

Unique Red Outerply

Lets everyone know you are using the best tube for a seamless finish

*pouring rate based on tube size and specific job site conditions
